

Steve Myers

Software Developer

Margate, FL 33063

Cell: 954.857.4750

steve.myers.sw@gmail.com

Summary

An enthusiastic developer with broad knowledge across many technologies and a huge appetite for learning new ones. Has transformed designs and ideas into profitable, widely used software single-handedly. Looking to bring experience with collaboratively designing large infrastructure in other fields into the software arena.

Expertise

Immediate proficiency with many industry standard programming languages and technologies, including mobile and front-end and back-end web technologies.

Ability to learn any programming language, library or framework quickly, independently becoming proficient in a matter of days.

Able to transfer acquired knowledge into working solutions in collaboration with the client with little fanfare, while following best practice coding guidelines and producing maintainable code.

Ability to effectively communicate with other professionals.

Experience/proficiency with the following programming languages/technologies: Java, Android SDK/NDK, C++, C#, Visual Basic .NET, HTML5, CSS3, JavaScript, jQuery, Bootstrap, PHP, MySQL, Git, Linux

Experience

Single Minded Productions

2012 - Present

Software Developer

Independently designed, programmed, tested, debugged, maintained and marketed several highly rated and profitable Android applications currently in active use by tens of thousands of people worldwide.

Developed useful desktop applications and scripts and extensions for popular software packages in the mechanical and electrical engineering disciplines.

Developed a website template sold in the theme market. Developed a web application for managing an office football pool.

Kamm Consulting

2006 - Present

Electrical Designer

Designed electrical and plumbing systems for large, high profile commercial buildings. Coordinated requirements with architects, contractors and other engineering professionals. Performed project management, responding to clients' needs and sharing responsibility for project completion.

Education

Baker College

2013 - 2016

Bachelor of Computer Science

Currently maintaining a near 4.0 GPA and a position on the Dean's List. Often declared the 'wizard' of classes involving coding and algorithm complexity analysis, leading other students to make remarks such as: "Why are you even in this class, you should be teaching it!".

University of Central Florida

1998 - 1999

General Studies
